

## Docker Assignment-1

### Deploying WAR file using Dockerfile and run on different ports.

Dockerfile:

```
FROM tomcat:9.0
```

```
COPY /project/target/LoginWebApp.war /usr/local/tomcat/webapps/LoginWebApp.war
```

```
EXPOSE 8080
```

```
CMD ["catalina.sh", "run"]
```

```
docker build -t myapache:1.0 .
```

```
docker run -dp 8080:8080 --name server myapache:1.0
```

```
docker run -dp 8090:8080 --name server1 myapache:1.0
```

```
docker run -dp 80:8080 --name server2 myapache:1.0
```
